

# How to Manually Update Plugins to Update Expiration Date

Log in to your Nessus client as **Administrator**.

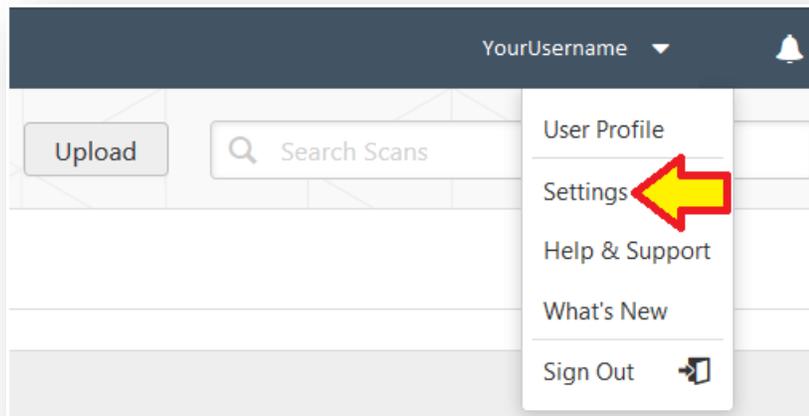

The image shows the Nessus login interface. At the top is the Nessus logo. Below it are two input fields: 'Username' with a person icon and 'Password' with a lock icon. There is a 'Remember Me' checkbox and a 'Sign In' button.

Click the **Username** at the top right of the page.

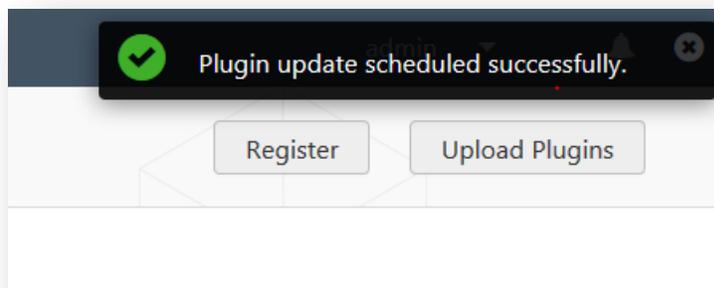

Click **Settings**.

Under **Plugins**, click the circular icon next to **Last Updated**.

You will receive a notification once the plugin update has scheduled successfully.

You will need to log out, then log back in to the Nessus client in order for the new expiration date to appear.

Note: It may take up to an hour for the plugins to complete and the new expiration date to appear.

## About Tenable Network Security

Tenable Network Security provides continuous network monitoring to identify vulnerabilities, reduce risk, and ensure compliance. Our family of products includes SecurityCenter Continuous View™, which provides the most comprehensive and integrated view of network health, and Nessus®, the global standard in detecting and assessing network data.

Tenable is relied upon by more than 24,000 organizations, including the entire U.S. Department of Defense and many of the world's largest companies and governments. We offer customers peace of mind thanks to the largest install base, the best expertise, and the ability to identify their biggest threats and enable them to respond quickly.
