The Problems We Solve

Organizations have more security products than ever, yet the frequency and severity of cyberattacks keeps growing. Multiple security approaches solve specific challenges, but can lead to gaps in defensive coverage. These gaps expose organizations to data breaches and fail to detect hidden threats and vulnerabilities, while giving those inside the organization a false sense that they are fully protected.

Tenable Network Security transforms security through comprehensive solutions that provide continuous visibility and critical context, enabling decisive actions to protect organizations of all sizes. Tenable eliminates blind spots, prioritizes threats and reduces exposure and loss.

Our Customers

With more than one million users and over 21,000 customers worldwide, organizations trust Tenable for proven security innovation. Tenable customers range from Fortune Global 500 companies, to the global public sector, to mid-sized enterprises in all industries, including finance, government, healthcare, higher education, retail and energy.

Our History

Tenable was founded in 2002 to help customers in all sectors solve their most difficult security challenges. Today, thousands of organizations around the world rely on Tenable to defend against threats that are at the center of board-level and public policy discussions. Tenable has also earned numerous industry awards and distinctions, including those from SC Magazine, the SANS Institute, Frost & Sullivan, AusCERT and NetworkWorld Asia. In October 2016, the company announced its first acquisition with the purchase of San Francisco-based container security company FlawCheck. Tenable was also one of only two pure-play cybersecurity software companies named to the 2016 Forbes Next Billion-Dollar Startups list. In 2015 the company announced a \$230M Series B investment led by Insight Venture Partners and Accel.

Our Technology

Bring clarity to your security and compliance posture with Tenable.io™. Built on the leading Nessus technology from Tenable, this cloud-based vulnerability-management platform delivers a fresh, asset-based approach that accurately tracks your resources, while offering specialized applications for container security and web application scanning. Maximizing visibility and insight, Tenable.io effectively prioritizes your vulnerabilities while seamlessly integrating into your environment.

Nessus® is the world's most widely deployed vulnerability assessment solution, chosen by millions of users across the globe. Nessus quickly and accurately identifies vulnerabilities, configuration issues and malware in physical, virtual and cloud environments and helps you prioritize what you need to fix first.

SecurityCenter® leverages and consolidates Nessus scan data into an easy to understand management console. Use SecurityCenter to manage and analyze vulnerability data across your organization, prioritize security risks and obtain a clear view of your security posture. Measure and visualize the effectiveness of your security program with SecurityCenter's pre-built, highly customizable dashboards and reports and the industry's only Assurance Report Cards® (ARCs).

SecurityCenter CV™, the market-leading continuous monitoring platform, provides comprehensive visibility of your security and compliance posture, along with actionable insight into prioritized weaknesses to help you find and fix vulnerabilities faster.
