

Corporate Fact Sheet

The Problem We Solve

Organizations of all sizes are embracing digital transformation, resulting in an explosion of new platforms, devices, and approaches including cloud, SaaS, mobile, IoT and DevOps. The modern cyber attack surface is no longer just a laptop or server but is now a complex mix of connected devices, services and computing platforms which is constantly expanding and contracting like a living organism. The failure of old tools and one-size-fits-all approaches to scanning the network for vulnerabilities which were designed for the old world of traditional IT means that most organizations can't keep pace with modern assets, creating a massive gap in an organization's ability to understand and accurately represent its Cyber Exposure at any given time. Organizations need a new way to get the visibility and focus required to close the Cyber Exposure gap against the modern attack surface.

Tenable is the pioneer of Cyber Exposure, an emerging discipline for managing and measuring the modern attack surface to accurately understand and reduce cyber risk. Built on the roots of Vulnerability Management designed for traditional IT, Cyber Exposure transforms cybersecurity from identifying bugs and misconfigurations and expanding it to live discovery into every asset in any environment. Cyber Exposure also delivers continuous visibility into where assets are secure versus exposed, and to what extent, and prioritizes remediation based on the asset's business criticality and the severity of the exposure. The adoption of Cyber Exposure will ultimately empower organizations to translate raw security data into a metrics driven program where every business decision factors in Cyber Exposure in the same way as other business risks, to make more proactive and better decisions.

QUICK FACTS	
FOUNDED 2002	HEADQUARTERS Columbia, MD, U.S. International headquarters in Dublin, Ireland Offices in 20 countries
MARKET REACH 23,000 customers including: <ul style="list-style-type: none"> • more than 50% of the Fortune 500 • 10 of the top 10 largest U.S. technology companies • 8 of the top 10 largest U.S. financial institutions 1.6M+ global users	
LEADERSHIP	
Amit Yoran , Chairman and CEO Renaud Deraison , CTO and Co-Founder Jack Huffard , President, COO and Co-Founder Steve Vintz , Chief Financial Officer John Negron , Chief Revenue Officer Jennifer Johnson , Chief Marketing Officer Stephen Riddick , General Counsel Dave Cole , Chief Product Officer	

Our Customers

With more than 1.6 million users and more than 23,000 customers worldwide, organizations trust Tenable for proven security innovation. Tenable customers include more than 50 percent of the Fortune 500, large government agencies, and mid-sized organizations across the private and public sectors.

Our Technology

Tenable.io™ is the first Cyber Exposure platform to provide visibility into any asset on any computing platform. It enables security teams and executives to manage vulnerabilities and risks across the entire attack surface with confidence. Built on the leading Nessus technology from Tenable, Tenable.io delivers a modern approach that supports dynamic assets like cloud and containers.

The SecurityCenter® family manages and analyzes vulnerability data across the organization, prioritizes security risks and provides automated frameworks and compliance reporting. With continuous monitoring, security teams can measure and visualize the effectiveness of the security program using SecurityCenter's pre-built, highly customizable dashboards and reports and the industry's only Assurance Report Cards®.

Nessus® is the world's most widely-deployed vulnerability assessment scanner, chosen by more than 1.6 million users across the globe. Nessus quickly and accurately identifies vulnerabilities, configuration and compliance issues, and malware in physical, virtual and cloud environments.
