TENABLE CLOUD SECURITY (TCS) INTRODUCTION

The TCS Introduction Course is available for no cost at Tenable University and consists of a series of short on-demand videos providing the fundamental information needed to configure and use TCS to secure your cloud infrastructure from development to runtime, and gain actionable visibility into all identities and entitlements.

Participants in this course will learn the basics of how to set up and start using the TCS platform. Tenable presents basic features and demonstrates usage for each topic, including understanding policies, interpreting findings, creating reports and reviewing identities and entitlements.

AUDIENCE

This course is suitable for those interested in learning basic operation of TCS.

PREREQUISITES

None.

COURSE SYLLABUS

1. Introduction to Tenable Cloud Security
2. Dashboard
3. Asset Inventory
4. Activity Log
