Tenable Professional Service

Tenable Custom Integrations Service

The Custom Integration Service from Tenable Professional Services connects existing systems to our solutions, dispersing and correlating vulnerability assessment data to give you a comprehensive view of your security posture.

With continuous visibility and critical context you are ready to take decisive action. We will work with your team to understand your desired outcome and the integrations you need to get there. We can quickly integrate Tenable products with third-party applications such as content management databases (CMDB), asset management systems and ticketing systems.

During the Custom Integration Service, we will work with your team to:

- design and develop API scripting to enable data import/export,
- transfer our knowledge of API functionality and best practices,
- and, enable your team to tune and scale integrations as needed afterwards.

Experienced Professional Services Team

Tenable Professional Services' implements products to solve your most pressing security problems, enabling your organization to see, predict and act on cyber risks.

We capitalize on our combined years of industry experience to tackle the most challenging requirements. We'll help you realize the value of your Tenable investment quickly so you know your RBVM program is effective.

Our broad portfolio of services and training is available worldwide, remotely or on-site, to meet your needs.

Service Outcomes

- **Eliminate data silos** to gain a comprehensive view of security risks across your environment
- **Make informed risk-management decisions** by combining dispersed data and correlating across systems
- **Integrate Tenable solutions with existing technology** to maximize your investments
- **Improve your workflow** by combining technologies into one centralized Tenable dashboard

ABOUT TENABLE

Tenable is the exposure management company, exposing and closing the cybersecurity gaps that erode business value, reputation and trust. The company's AI-powered exposure management platform radically unifies security visibility, insight and action across the attack surface, equipping modern organizations to protect against attacks from IT infrastructure to cloud environments to critical infrastructure and everywhere in between. By protecting enterprises from security exposure, Tenable reduces business risk for approximately 44,000 customers around the globe. Learn more at tenable.com.
