A service engagement with Tenable® Professional Services helps optimize your solution implementation so you can gain visibility, provide context and communicate cyber risk at all levels of your organization.

Microsoft Active Directory (AD) and Entra ID are used by the vast majority of large organizations around the world as their primary authentication and authorization method, making it a common attack vector. Since large global enterprises have complex, constantly evolving AD architectures, their security teams struggle to keep pace in enforcing best practices and monitoring security.

The Tenable Identity Exposure Optimization service consists of three workshops scheduled over the course of a year. During these sessions, our consultants will help you ensure resiliency of your AD security monitoring, identify gaps and recommend actions to maximize the effectiveness of your Tenable platform. This service is available for both the on-premises and cloud-based software as a service (SaaS) Tenable platforms.

Efficiently assessing your Active Directory risks will enable your organization to make more effective, business-focused decisions.

The Tenable Professional Services team and our global network of certified partners provide advice on product optimization and industry best practices. Their experience has been gained from years of hands-on experience with thousands of customers worldwide.

**SERVICE OUTCOMES**

- Optimize your Tenable Identity Exposure solution to ensure it is up-to-date and operating with high efficiency.

- Learn about new product features through our presentations and explanations of the latest enhancements.

- Review Indicators of Exposure (IoE) and Indicators of Attack (IoA) and adjust security profiles accordingly to eliminate attack paths.

- Connect with the Tenable Identity Exposure team to ask your AD security questions and get answers that are tailored to your business risks.

*Use Tenable Identity Exposure to find and fix AD weaknesses before attacks happen.*
KEY BENEFITS

Platform Health Check and Version Update
Our consultants will ensure that your Tenable Identity Exposure solution is working as expected. The platform will also be updated to the latest version, if you are using the on-premises architecture.

New Features Presentation
Our consultants will present the new features available in the platform since the last workshop.

Rigorous Solution Review and Implementation
Our consultants will provide guidance and direction while sharing our industry knowledge and best practices, as we work with you to fine-tune many aspects of the Tenable Identity Exposure solution to optimize your usage.

Knowledge Sharing
Our consultants will share their knowledge of AD and Entra ID security best practices to help you to determine where you should focus your remediation efforts.

Comprehensive Solution Documentation
Tenable will provide links to relevant and useful documentation to help maintain your deployment.

Supporting your Growth
Organizations change and develop over time. Tenable Professional Services can help ensure your solution stays aligned to your evolving business requirements. We welcome the opportunity to discuss your future needs.

Experienced Professional Services Team
Tenable Professional Services’ goal is to implement our products to solve your most pressing security problems, enabling your organization to see, predict and act on cyber risks. To accomplish this, we capitalize on our combined years of industry experience to tackle even the most challenging requirements.

By engaging Tenable Professional Services, you can realize the value of your Tenable investment more quickly to feel confident you are on the right path for security program maturity. We have a broad portfolio of services and training available worldwide, remotely or on-site, to meet your specific needs.

About Tenable
Tenable® is the Exposure Management company. Approximately 43,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world’s first platform to see and secure any digital asset on any computing platform. Tenable customers include approximately 60 percent of the Fortune 500, approximately 40 percent of the Global 2000, and large government agencies.
