TENABLE OT SECURITY (TOT) SPECIALIST COURSE

This fast-paced TOT Specialist Course is a combination of lectures and hands-on exercises. Protecting industrial networks from cyber threats is a top concern today, as the convergence of IT and Operational Technology (OT) infrastructure has expanded the attack surface and increased risk. Tenable’s Industrial Control System (ICS) security capabilities help you maximize the safety and reliability of your operational technology environment.

OVERVIEW

Participants in this two-day course will learn how to deploy TOT. Tenable’s OT platform to manage assets and proactively detect and mitigate threats using a risk-based approach. Content for the instructor-led course also includes policy configuration, integration with Tenable.sc™ and troubleshooting.

AUDIENCE

This course is suited for professionals with OT security responsibilities who want to gain hands-on experience in deploying, configuring and supporting the TOT platform. It is recommended for those seeking to obtain TOT Specialist Certification.

PREREQUISITES

Tenable highly recommends that all participants complete the free TOT Introduction Course available at Tenable University before attending this course.

COURSE SYLLABUS

1. Technology Overview
2. Deployment Considerations
3. Core Appliance Deployment
4. Post-Deployment Configuration
5. Sensor Deployment
6. Asset Discovery
7. Active Query for Vulnerability Assessment
8. Analysis with Tenable OT Security
9. Analysis with Tenable Security Center
10. Prioritization
11. Dashboards
12. Reports
13. Maintenance and Support
