Tenable Patch Management Specialist Instructor-led Course

Tenable University

Course overview

The Tenable Patch Management Specialist Course will give you the knowledge and skills you need to effectively utilize the Tenable Patch Management solution. It is designed for personnel responsible for planning, prioritizing, and deploying patches across enterprise IT environments.

This course is available as a Virtual Instructor-Led Training (VILT). Participants will learn how to create advanced patching strategies for special circumstances using deployment channels, bots and advanced patching filters. They will also formulate risk-based deployment plans leveraging Vulnerability Priority Rating (VPR) and targeted Common Vulnerabilities and Exposures (CVE) coverage filters. They will configure Business Unit hierarchies using sensor scoping, settings inheritance, custom maintenance windows and user interaction policies. Finally, they will use integrated dashboards, interactive metrics and stakeholder reports to analyze enterprise compliance metrics and discover gaps.

The course features a blend of lectures, demonstrations, and lab exercises, all designed to promote active engagement and enhance learning outcomes. Eligible for CE credit.

Audience

Tenable Patch Management Specialist is suited for professionals with operational responsibilities who want to expand their knowledge to maximize solution effectiveness.

Prerequisites

We highly recommend that all participants complete the free Tenable Patch Management Introduction Course at Tenable University before attending this course.

Key benefits

- **Hands-on lab environment**
  Gain practical, real-world experience with Tenable products in realistic scenarios
- **Flexible scheduling**
  Live instructors teach courses remotely from multiple time zones to meet your availability requirements
- **Knowledge you can use**
  Starting with a firm foundation, progress deeper into deployment planning and vulnerability analysis
