tenable Vulnerability Management

TENABLE VULNERABILITY MANAGEMENT EXPERT CERTIFICATION EXAM

TENABLE VULNERABILITY MANAGEMENT EXPERT CERTIFICATION

Tenable Vulnerability Management (formerly Tenable.io™) is a comprehensive cloud-based vulnerability management solution that provides complete visibility into the security posture of your distributed and complex IT infrastructure. The Tenable Vulnerability Management Expert Certification is a two-part exam; written and practical, that validates your in-depth product and best practices knowledge.

The exam is taken online in a proctored environment. The written exam must first be completed before you are allowed to take the practical exam. Upon successful completion of both exams, a Tenable Vulnerability Management Expert Certification will be provided in electronic format.

WRITTEN EXAM

Candidates are required to complete a sixty (60) question exam. The exam bank consists of both multiple-choice and true/false questions. We suggest candidates read the questions carefully before answering.

Two (2) hours are allocated for completion, and a minimum score of 80% is required to pass.

PRACTICAL EXAM

Candidates are required to complete a set of activities simulating a real-world environment. The practical exam can include up to thirty (30) tasks to complete, with a series of questions asked based upon the completed tasks.

Four (4) hours are allocated for completion, and a minimum score of 80% is required to pass.

WHAT YOU WILL BE TESTED ON

1. API Basics
2. API Operations
3. Tenable Lumin Fundamentals
4. Advanced Tenable Lumin
5. Introduction to Tenable Web App Scanning (formerly Tenable.io Web Application Scanning)
6. Basic Tenable Web App Scanning
7. Credentialed Tenable Web App Scanning
8. Advanced Tenable Web App Scanning
9. Installation of On-Premises Tenable Web App Scanning
