

## KEY BENEFITS

- Disperses and correlates data with other systems, enabling better informed decisions
- Enables integration with new and existing technology, ensuring you make the most of your investments and keep pace with emerging threats and technology
- Eliminates silos of data for a more comprehensive view of your security posture

## CUSTOM INTEGRATION WITH TENABLE PROFESSIONAL SERVICES

### KEY CHALLENGES

Most comprehensive security strategies rely on several solutions to deliver the most effective coverage. Integrations are often the key to Making the most of these investments. Properly configured integrations allow you to gain complete visibility and context by connecting new and existing systems.

Most organizations lack the expertise to develop the integrations necessary to connect their security infrastructure. This results in silos of security data and disparate systems that lead to making less informed risk decisions.

### CUSTOM INTEGRATION SERVICES OVERVIEW

With Tenable Custom Integration Services can help you connect your existing systems to our solutions, ensuring your vulnerability assessment data is dispersed and correlated. With a comprehensive view of your security posture, continuous visibility and critical context you are ready and enabled to take decisive action.

We will work with your team to understand your desired outcome and the integrations needed to get there. Leverage Custom Integration Services from Tenable to take your security practice to the next level.

### HOW WE WILL WORK WITH YOU

Tenable Custom Integration Services enables you to quickly integrate Tenable products with other third-party applications such as content management databases (CMDB), asset management systems, and ticketing systems, to name a few.

The two primary outcomes of a successful CIS are:

First, to design and develop API scripting to enable data imports and exports. This includes all methods needed for integration with third-party applications.

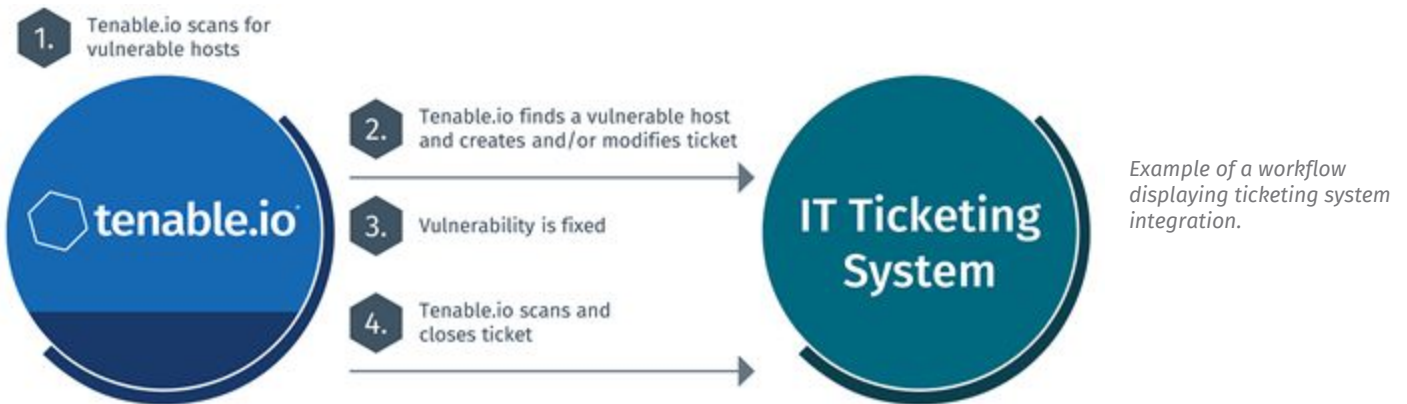

Second, to transfer knowledge of API functionality and best practices that enable your team to tune and scale integrations as needed after the engagement.

### COUNT ON TENABLE PROFESSIONAL SERVICES AND OUR CERTIFIED PARTNERS

The Tenable Professional Services team and our global network of certified partners go beyond basic installation services to work with you for success before, during and after deployment. You can trust Tenable security experts to provide advice on product optimization and industry best practices gained from years of hands-on experience with thousands of customers worldwide. Our help with your deployment elevates your security practice and delivers data for efficient and effective risk management decisions.

## STEPS OF A CUSTOM INTEGRATION

ACTIVITY	ACTIVITY DETAIL
Design	The Tenable consultant will meet with you to: <ul style="list-style-type: none"> <li>• Identify specific data correlation needs</li> <li>• Identify goals and objectives of the integration</li> </ul>
Build	After defining the requirements, the Tenable consultant will: <ul style="list-style-type: none"> <li>• Develop a custom solution based on the defined requirements</li> <li>• Leverage your knowledge of any third-party systems to ensure a successful project</li> </ul>
Deploy	The Tenable consultant will: <ul style="list-style-type: none"> <li>• Deliver the final integration scripts to you for installation in your production environment</li> <li>• Assist you in installing, configuring, testing and validating the solution performance</li> <li>• Transfer knowledge of best practices and other information necessary to maintain and update the integration</li> </ul>
