

Quick Start Deploy for Tenable.sc

SERVICES OVERVIEW

A Quick Start from Tenable® Professional Services and our certified partners helps your organization quickly implement its instance of Tenable.sc™ while immediately improving its risk-based vulnerability management program.

Tenable.sc provides the visibility and context needed to help your organization identify vulnerabilities and remediate them. This two day Quick Start Deploy service is designed to quickly install and configure Tenable.sc to run efficiently, define the scope of scans, detect compliance misconfigurations and identify vulnerabilities. Additionally, this service can cut the time it takes to meet current reporting and remediation needs and build a strong and stable foundation that can be expanded as your organization grows.

SERVICES OUTCOME

- Ensure Tenable.sc is properly deployed with Tenable's experienced consultants
- Speed up time-to-value in using Tenable.sc Vulnerability Management capabilities
- Thoroughly grasp industry leading concepts with collaboration tools, hands-on experience and knowledge transfer
- Gain awareness into the operation and state of IT assets
- Validate Tenable.sc scanning and other operational capabilities
- Receive documentation and knowledge needed to maintain the deployment in its most effective state

WORKING TOGETHER

Tenable Professional Services, or one of our qualified partners, will work with one or more technical contacts at your organization. This contact should have system administration responsibilities and appropriate system information access privileges.

The Quick Start Deploy is delivered remotely, onsite, or a combination of both during a two-day period. The Quick Start engagement begins with a formal kick-off meeting to discuss the project timeline and provide the necessary information in advance on how to prepare for the Quick Start.

Upon conclusion of the engagement, you will receive key documentation to help maintain the deployed instance of Tenable.sc and continue the evolution towards developing a complete risk-based vulnerability management program.

Understand your risk and know which vulnerabilities to fix first with Tenable.sc
