

KEY BENEFITS

- Aligns your installation and configuration of Tenable.sc CV and its components with your business requirements.
- Implements and optimizes your Tenable.sc CV solution according to leading industry practices.
- Validates your Tenable.sc CV scanning, log correlation and other operational capabilities.
- Delivers the documentation and knowledge you need to maintain your deployment in its highly optimized, most effective state.

QUICKSTART FOR TENABLE.SC CONTINUOUS VIEW

A Tenable.sc CV QuickStart from Tenable Professional Services and our certified partners helps you quickly implement your solution and immediately improve your security posture.

QUICKSTART SERVICE OVERVIEW

Tenable.sc™ Continuous View (formerly SecurityCenter Continuous View) provides continuous visibility into threats to your security and the critical context needed to help you take decisive action to protect your organization. A QuickStart service with Tenable Professional Services or one of our highly qualified partners helps you swiftly install and configure your Tenable solution according to best practices. This ensures your solution runs efficiently, identifies vulnerabilities, and continuously monitors network traffic in real time to detect anomalous activity and enable you to find actionable context in your data. There is no need to wait to begin actively managing risks and improving your security posture. Consider a QuickStart service to get you there faster.

DO YOU NEED A QUICKSTART?

If you have purchased Tenable.sc CV and want a quick path to get your solution up and running and delivering results, then a QuickStart is right for you. The service will help you save time and resources during the deployment process and shorten your time to value for your Tenable investment. With a QuickStart, you can decrease the time it takes to meet your current vulnerability management and continuous network monitoring objectives. We will work with you to build a strong and stable foundation to address the increased number of threats to your organization's security.

HOW WE WILL WORK WITH YOU

In a QuickStart for Tenable.sc CV, you will work with a Tenable Certified Security Consultant from Tenable Professional Services or one of our qualified partners. We will work with one or more technical contacts with system administration responsibilities and appropriate system information access privileges.

We typically perform the approximately four-day engagement remotely, but it can be performed on-site, depending on what is most convenient to you. Our consultants will advise you in advance of your engagement on how to prepare for your QuickStart service so that it goes smoothly and you get the most benefit.

When the service concludes, you will receive key documentation to help you maintain your deployment and reduce your Cyber Exposure gap as new threats emerge.

STEPS OF A QUICKSTART

ACTIVITY	ACTIVITY DETAIL
Hold Kick-off Meeting	Interview key stakeholders, discuss service outcomes, and introduce a Deployment Worksheet
Create Solution Design	<ul style="list-style-type: none"> Implement leading Practices for installation and configuration of Tenable.sc CV
