

TENABLE.CS INTRODUCTION ON-DEMAND TRAINING COURSE

TENABLE.CS INTRODUCTION

The Tenable.cs™ Introduction Course is available for no cost at [Tenable University](#) and consists of a series of short on-demand videos providing the fundamental information needed to configure and use Tenable.cs to secure cloud resources and Infrastructure as Code (IaC) before deployment and during runtime.

Participants in this course will learn the basics of how to set up and start using the Tenable.cs platform. Content includes creating projects, understanding policies and policy groups, connecting various cloud accounts and IaC repositories, and setting up alerts and ticketing. Use of the Command Line Interface (CLI) will also be covered. Tenable® instructors present basic features and demonstrate usage for each topic.

AUDIENCE

This course is suitable for people interested in learning basic operational use of Tenable.cs.

PREREQUISITES

None.
