DATA SHEET

TENABLE.OT SPECIALIST CERTIFICATION EXAM

TENABLE.OT SPECIALIST CERTIFICATION

Tenable.ot™ provides visibility, security and control across Operational Technology (OT) and converged OT/IT environments. The Tenable.ot Specialist Certification is a two-part exam, written and practical, that validates your ability to plan, deploy, verify and troubleshoot Tenable's Operational Technology (OT) platform.

The exam is taken online in a proctored environment, and candidates are allowed to use review materials for assistance. The written exam must first be completed before you are allowed to take the practical portion. Upon successful completion of both exams, a Tenable.ot Specialist Certification will be provided in electronic format.

WRITTEN EXAM

Candidates are required to complete a sixty (60) question exam. The exam bank consists of both multiple-choice and true/false questions. We suggest candidates read the questions carefully before answering.

Two (2) hours are allocated for completion and a minimum score of 80% is required to pass.

PRACTICAL EXAM

Candidates are required to complete a set of activities simulating a real-world environment. The practical exam may include up to thirty (30) tasks to complete, and each is scored equally.

Four (4) hours are allocated for completion, and a minimum score of 80% is required to pass.

WHAT YOU WILL BE TESTED ON

1. Network Requirements
2. Appliance Deployment
3. Sensor Deployment
4. Passive Detection
5. Integration with Tenable.sc™
6. Active Queries
7. Events
8. Policies
9. System Settings
10. Troubleshooting

RECOMMENDED PREPARATION

- **Tenable.ot Specialist Course** instructor-led training
- **Official Tenable® Documentation** for Tenable.ot
- **Tenable Product Education** YouTube Channel
- **Completion of Multiple Tenable.ot Deployments** or experience supporting a Tenable.ot environment (if taking exam only)
